Education

University of Minnesota — Minneapolis, MN
BASc in Information Technology Infrastructure — AWS Cloud Club Officer — *Sept. 2023 – Dec. 2026*

North Hennepin Community College — Brooklyn Park, MN
PSEO — *Aug. 2021 – May 2023*

Experience

D&IT AI Automation Intern — May 2026 - Aug. 2026
Polaris — *Medina, MN*
- Designed and developed AI-driven solutions integrating enterprise knowledge platforms and business systems
- Architected a Dataverse-based LPPD lessons learned database to support structured intake, reviewer approval, governed views, and future Copilot Studio retrieval
- Evaluated AI application performance through testing frameworks, quality measurements, and user feedback analysis
- Partnered with business and technical teams to translate operational challenges into AI-enabled solutions

D&IT Modern Workplace Intern — May 2025 - Aug. 2025
Polaris — *Medina, MN*
- Built a Copilot Studio chatbot prototype to address technology questions
- Reduced weekly message sorting routine by over 75% via Copilot Studio and Power Automate
- Inventoried and audited non-standard applications, enhancing security & reducing costs
- Automated report generation with Power Automate, cutting processing time by 90%

Technical Support Representative — Jan. 2024 - Present
Minnesota Orchestra — *Minneapolis, MN*
- Developed PowerShell automation implementing DoD SCAP compliance standards for server hardening
- Led Splunk integration initiative to centralize IT operations data and create real-time monitoring dashboards with AWS, Azure, Microsoft, and Auvik
- Resolved 90%+ of tech issues (POS, scanners, signage) same-shift during live events
- Delivered technical support during concerts with 1500+ guests, ensuring seamless patron experience

Teaching Assistant - Cloud Infrastructure & DevOps — Jan. 2026 - Present
University of Minnesota - Twin Cities — *Minneapolis, MN*
- Designed and developed enterprise-style hands-on technical labs simulating Agile software delivery and sprint-based project execution
- Designed role-based project tracks for developers, QA, system administrators, and project managers to encourage cross-functional collaboration and mirror real-world Agile team dynamics
- Built learning environments incorporating Docker, Kubernetes, Terraform, Ansible, GitHub Actions, Prometheus, Grafana, and cloud infrastructure concepts
- Performed validation and testing of lab environments to ensure reliability, usability, and instructional effectiveness

Projects

Self-Hosted AI Assistant — June 2026
- Built a self-hosted LLM platform using LM Studio and Open WebUI to maintain full control over personal data and AI interactions
- Implemented RAG pipelines with embedding models and vector search to enable retrieval from private knowledge sources
- Integrated web search and retrieval workflows to supplement local model responses with external information
- Configured secure remote access through Tailscale, enabling private AI access from any location without exposing services publicly

Technical Skills

Cloud & Infrastructure: AWS (EC2, S3, Lambda, DynamoDB, ECS, Bedrock), Azure
DevOps & Platform Engineering: Docker, Kubernetes, Terraform, Ansible, GitHub Actions, Git
AI Engineering: RAG, Embeddings, Vector Search, AWS Bedrock, LangChain, MCP, Copilot Studio
Security & Governance: IAM, AI Governance, Responsible AI, Least-Privilege Access, SCAP Compliance, DoD Security Standards
Monitoring & Observability: Grafana, Prometheus, CloudWatch, Splunk
